Professional Profile

Dynamic and solution-oriented Computational Engineering student with a strong foundation in software development, embedded systems, and technical leadership. Expert in bridging the gap between hardware and software, with proven experience in direct register manipulation and real-time processing. A proactive problem-solver and effective team leader with a diverse background in maintenance management and STEM education.

Skills & Certifications

- **Languages:** English (C1 Advanced Certification - Oxford), Spanish (Native).
- **Programming Languages:** C, C#, Java, Assembly Language (ATmega328P with direct register manipulation).
- **Software & Frameworks:** .NET Framework (Windows Forms), Visual Studio, Microchip Studio, Game Logic development.
- **Data & Cloud:** MongoDB Atlas, Google Cloud Services, Database Connectivity.
- **Engineering Fundamentals:** Graph Algorithms (DFS, BFS, Tarjan, Kruskal), Embedded Systems, Circuit Analysis.
- **Creative & Design:** Concept Art, Pixel Art, Animation, Social Media Strategy.

Professional Experience

Role & Period	Organization	Key Contributions
Robotics Teacher 2025 – Present	Steve Jobs School	Designing and implementing a comprehensive robotics curriculum focused on STEM engagement and technical skill-building for students.
Computer Science Research Intern	LESD Laboratory, UASLP (Faculty of Engineering)	Contributing to advanced R&D projects in computer

Role & Period	Organization	Key Contributions
2024 – Present		science, focusing on system optimization and experimental development.
Maintenance Manager 2022 – 2023	Cinépolis	- Engineered and executed preventative and corrective maintenance strategies for complex electrical, mechanical, and refrigeration systems. - Supervised technical staff, managed operational budgets, and streamlined invoice processing.
Social Media Manager & Robotics Teacher 2019 – 2020	Innovatronics	- Led digital outreach and community engagement across Facebook, Instagram, and YouTube. - Developed cultural initiatives and educational frameworks for robotics programs.
Robotics Teacher 2017 – 2019	NeoCicitec	Developed curriculum and educational activities for early-stage robotics education.

Key Academic & Personal Projects

- **"The Normal Knight" Video Game:** Directed thematic and conceptual art design; implemented core game logic using C# and Visual Studio.
- "Bloc de notas" (Notepad) Application:** Developed a fully functional text editor using C# and Windows Forms, focusing on UI/UX and file management.
- Embedded Systems & Graph Theory:** Implemented complex graph algorithms (DFS, BFS, Tarjan, Kruskal) using direct register manipulation in Assembly for the ATmega328P microcontroller.
- Software Suite:** Developed an image editor application and a Q&A database-connected game, integrating

backend and frontend components.

Education

- ---

Bachelor of Computational Engineering | Universidad Autónoma de San Luis Potosí (UASLP) | 2018 - Present
- **Mechatronic Technician** | Cecyte Plantel II Real de Minas | 2014 - 2018

Hobbies & Interests

Reading, Motorcycle Riding, Physical Fitness, Concept Art Design, singing, scenic arts.
